the DECKTET

This is a deck of cards with suits, ranks, and named images. It is, perhaps, the kind of tarot deck they use in the alternate universe where Charlemagne was a badger.

If you want ideas for what to do with the Decktet, point your web browser at

[HTTP://WWW.FECUNDITY.COM/DECKTET](http://www.fecundity.com/decktet)

There are 36 cards in the Decktet. You also get a reference card for the six suits (above) and an Excuse card (left).

The Excuse is a 37th card that has no suit or rank. You may opt to use in Decktet games.

THIS IS DELUXE VERSION 1A.
